What is a template. A pedagogical approach

1. Why do we need templates?

A part of the production process

A way of making things simpler to teachers and writers

A way of making things faster to teachers and writers

A way to be focused on pedagogical issues, and not on technical ones

A way to produce practical Units of Learning, instead of a full understanding of IMS LD

A way of disseminating IMS LD into teachers Community

A way of building bottom-up, from need to Spec
